

Cypress Trunk Sewer Project

Pardon our dust—we're upgrading the regional sewer system to serve the community for decades to come.

Starting as early as October 27, crews will begin work at the intersection of Moody St. and Lincoln Ave. as part of the **Cypress Trunk Sewer Project**.

This phase of work includes the installation of a bypass system to reroute sewer flow, ensuring uninterrupted service while we carry out manhole rehabilitation work. A mix of day and night work may be needed to complete this phase.

Location: Intersection of Moody St. and Lincoln Ave.

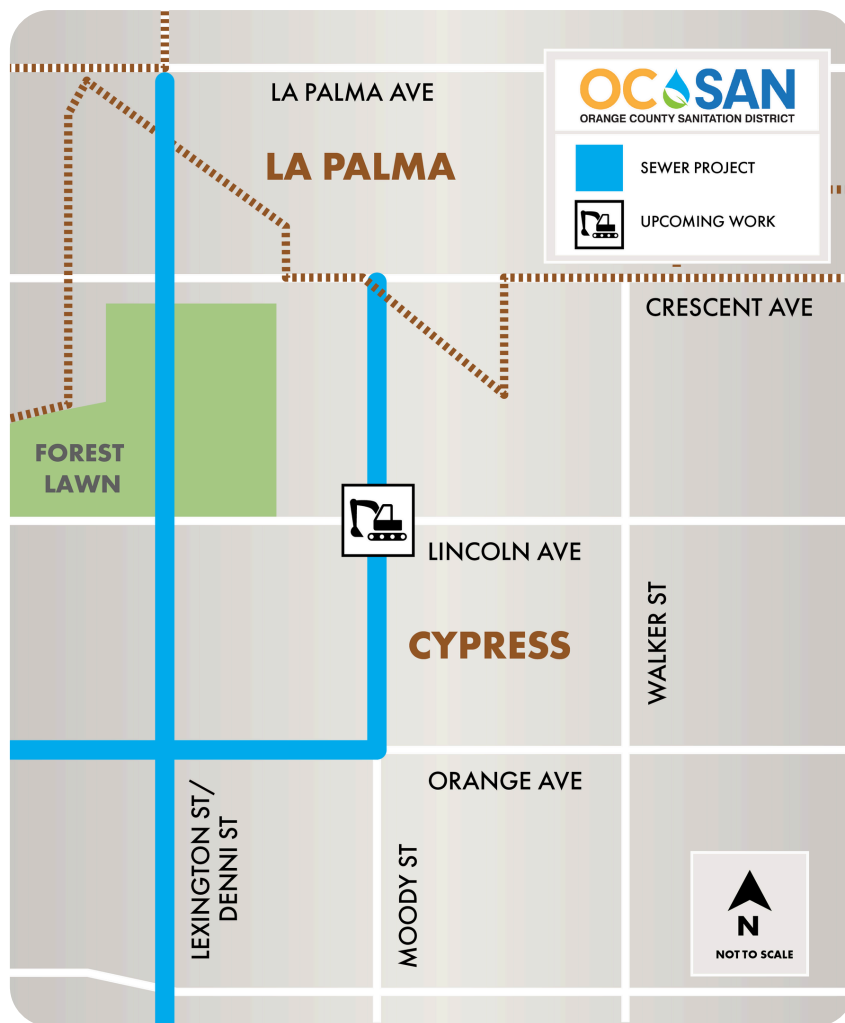

When: Starting as early as **Monday, October 27** and lasting about one month.*

Hours: Monday - Friday,

- Day: 8:30 a.m. - 4:30 p.m.
- Night: 8:00 p.m. - 6:00 a.m.

What to Expect:

- Reduced lanes near the work area.
- Left turns from northbound Moody St. onto Lincoln Ave. will be restricted—follow all posted signs.
- Thru traffic will remain open in all directions.
- Permanent traffic control will remain in place until work is completed.
- Crosswalks may need to be closed.
- Increased activity, dust, and noise levels.

Cypress Trunk Sewer Project

The Project

The Cypress Trunk Sewer Project is enhancing 7 miles of sewer through various streets in the cities of Cypress, La Palma, and Los Alamitos. A mile of pipe will be replaced with a larger diameter pipe to increase the capacity, approximately 5.5 miles of pipe will be cleaned and injected with chemical grout to lengthen its service life, and approximately 100 manholes will also be replaced and/or rehabilitated.

The Need

The Cypress Trunk Sewer Project will ensure the continued reliability of the regional sewer system. The regional sewer line in the cities of Cypress, Los Alamitos, and La Palma is approximately 50 years old and in need of upgrades. These repairs will increase sewer capacity and allow for more efficient and reliable management while extending the life of the sewer pipes by another 50 years.

Stay Informed.

Follow us @OCSanDistrict

The Orange County Sanitation District (OC San) is a public agency that provides regional wastewater collection, treatment, and recycling services for approximately 2.6 million people in central and northwest Orange County. OC San operates two facilities, 15 pump stations, almost 400 miles of regional sewer pipes, and treats around 190 million gallons of wastewater each day.
